SPECIFICATIONS & ACCESSORIES

New PEUGEOT 2008 *SUV*

PEUGEOT

GT LINE (ALLURE +)

- Oxford Mistral Black / half leather effect trim with GT Line red stitch details
- Black mats with red stitching
- 17" Eridan diamond alloy wheels
- Aluminium sport pedals
- Peugeot embossed aluminium front door sills
- Gloss black roof bars
- Body colour spoiler with gloss black trim (except Nera Black pearlescent paint)
- Black seat belts with red border
- Nera Black door mirror shells
- Gloss black door arches, red border at front
- Nera black grille bead
- Red Peugeot lettering on front grille
- GT Line rear and side badges
- Front and rear stainless steel scuff plates and chrome-effect exhaust
- Flat bottom sports steering wheel, perforated full grain leather with red stitching
- Satellite Navigation
- Grip Control®

ALLURE (ACTIVE +)

- Rear parking aid sensors with rear view parking camera
- Body colour spoiler with gloss chrome trim
- Touchscreen with MirrorScreen (compatible with MirrorLink® and Apple CarPlay™)
- Wheel arch and body sill extensions
- Gloss chrome high level rear door trims
- Half leather effect Mistral Oxford black trim
- 16" Aquila Storm Grey diamond alloy wheels
- Chromed side window weatherstrips
- Front fog lamps with cornering function (static intersection lighting)
- Front headlamps with black mask
- Sparkling grey front and rear scuff plates
- Stainless steel boot sill
- Height adjustable passenger seat
- Full grain leather steering wheel
- Cielo panoramic roof with ambient lighting
- Leather / chrome gear knob

ACTIVE (ACCESS +)

- Automatic dual zone climate control air conditioning
- 16" alloy wheels
- Rear parking aid sensors
- Electric folding, heated door mirrors
- Automatic headlights
- Automatic wipers
- Electrochrome rear view mirror
- Front fog lamps
- One touch front and rear electric windows
- 7" multifunction touch screen with Bluetooth, Aux-In, USB sockets and steering wheel controls (replaces CD player)
- Hill Assist
- Leather trimmed steering wheel
- Dark tinted privacy rear / rear side windows

ACCESS

- ESP, ABS, EBFD, EBA
- Cruise control + speed limiter
- Driver & passenger airbags, front side + curtain airbags
- Spare wheel (petrol versions only / diesel versions come with space saver) + tyre pressure sensors
- Seat belt alarm + child safety door locking
- Rear seat 3-point ISOFIX location mounts x 2
- Front electric windows
- Radio / CD
- Bluetooth, Aux-In
- 12V accessory power point
- Electrically adjustable and heated door mirrors
- Manual air conditioning
- LED daytime running lights
- Aluminium painted roof rails

PURETECH PETROL TECHNOLOGY: EURO 6

Peugeot PureTech: A compact engine with huge spirit...

Peugeot PureTech is an advanced 3-cylinder petrol engine technology that offers a drive and performance normally associated with much bigger engines but with significantly improved fuel consumption and CO2 emissions. It's a product of Peugeot's 100 years of intelligent, innovative engineering and combines reduced weight materials with the efficiency of applying direct fuel injection to three cylinders. On some versions we've even added Turbo Power, optimising torque at all revs and delivering an engine with a unique personality and one which is ultimately designed to give you maximum driving pleasure and responsiveness, at any speed, for less.

The engine offers one of the most comfortable driving experiences on the market, even at low speeds, and the best low speed / power compromise: up to 130bhp with torque of 230 Nm. Combined with the new automatic EAT6 gearbox, the 1.2L PureTech 110 EAT6 S&S turbo 6-speed automatic low CO2 powertrain has become a reference in the segment.

Peugeot's Revolutionary PureTech petrol engine was crowned an Engine of the Year Winner in 2016 and 2015. The award, received for the second consecutive year, is the latest achievement for the revolutionary engine model.

With 120 patents to its name, the Turbo PureTech petrol engine cuts fuel consumption and CO2 emissions by 18% compared to its four-cylinder petrol predecessor. The engine holds two fuel economy records, claiming its first in Europe in 2014, with a manual transmission vehicle and a second in China, when an automatic model travelled 1,878 kilometres on a single tank, achieving a record-breaking 2.93 litres per 100 kilometres.

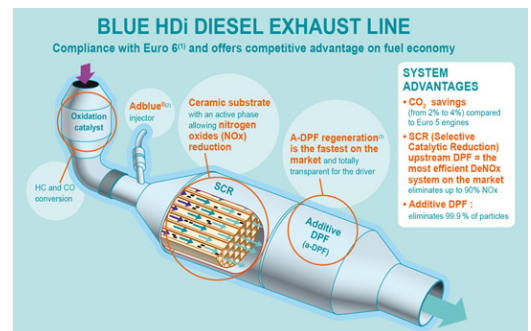

BLUEHDI DIESEL TECHNOLOGY: EURO 6

Peugeot BlueHDi : Pioneering on Low Consumption and CO2

BlueHDi is the name given to Peugeot's latest generation of diesel engines that meet stringent Euro 6 emissions legislation. The result of a world-famous diesel heritage plus innovation and engineering excellence developed on the race track of Le Mans, BlueHDi complies with Euro 6 emission standards, to deliver exceptional fuel economy and CO2 emissions alongside a driving experience rich in power and performance. With its Blue HDi technology, Peugeot continues to offer to its customers ever-cleaner Diesel engines, while maintaining its European leadership in low carbon emissions.

Blue HDi comprises two key systems:

- A Peugeot additive Diesel Particulate Filter, which dramatically reduces particulate emissions by 99.9% whatever their size and whatever the driving conditions.
- An SCR (Selective Catalytic Reduction) system upstream of the Particulate Filter which reduces 90% of the nitrogen oxides (NOx) produced by the engine.

The three-stage cleansing process specifically targets the pollutants of diesel combustion, removing hydrocarbons and carbon monoxide, reducing nitrogen oxides and eliminating 99.9% of particulates.

Combining a Diesel Particulate Filter and SCR delivers the cleanest diesel engine possible and exceptional fuel economy.

NEW EFFICIENT AUTOMATIC TRANSMISSION (EAT6) TECHNOLOGY

A new generation of 6-speed automatic gearboxes:

Peugeot's new generation of automatic gearboxes have been developed in collaboration with Aisin AW. The new efficient automatic transmission unit uses Quickshift technology, for faster gear changes and smooth operation, delivering superb driving pleasure and exceptional fuel and CO2 efficiency.

New 2008 SUV

Key Features

PEUGEOT i-COCKPIT

The new Peugeot 2008 SUV retains the revolutionary Peugeot i-Cockpit interior, combining a compact steering wheel for maximum control, a head up instrument panel for increased driver safety and from level two Active models, an intuitive touch screen to access vehicle functions, telephone and multi-media controls.

MIRROR SCREEN

Mirror Screen, from level two Active models, allows the use of compatible smartphone applications on your compatible smartphone to be displayed on the vehicle touch screen via Apple CarPlay for iPhone and MirrorLink for Android. Intuitive and easy to use, you can access Maps, play your music and listen to or send messages.

SATELLITE NAVIGATION

Linked to the 7" colour touch screen, Satellite Navigation is standard from level four GT Line 2008 SUV models. The interactive and easy to use Satellite Navigation system will take the stress out of any journey.

PARKING AID & REVERSING CAMERA

Rear parking aid sensors are standard from level two Active models. From level three Allure models, a colour Reverse Camera is added, located on the rear of the vehicle and linked to the 7" colour touch screen. The system increases visibility and driver confidence when reversing.

VISIBILITY PACK

The Visibility Pack, standard from level two Active models, includes automatic headlights, automatic windscreen wipers and an electrochromic rear view mirror.

TYRE UNDER-INFLATION DETECTION

Standard on all 2008 models, the tyre under-inflation detection system checks the tyre pressure and sets off a warning if the tyre pressure is low.

New 2008 SUV

Key Features

PARK ASSIST

Park Assist, an option from level two Active models, detects available parking spaces and assists you with your parking and exit manoeuvres, whether parallel parking or parking in bays. At speeds below 8 km/h, it automatically takes control of the steering and provides the driver with visual and audio information. You remain in control of the steering, braking, gears and, if your car has a manual gearbox, the clutch.

ACTIVE CITY BRAKE

Active City Brake, an option from level two Active models, is a new feature that operates at speeds of 30 km/h or less if the driver is unable to react, helping avoid accidents on city streets or making them less serious. A short-range laser sensor installed at windscreen level, detects obstacles and automatically applies maximum brake pressure, thereby helping avoid a collision or limit its consequences by reducing the impact speed.

DUAL ZONE AUTOMATIC AIRCON

Manual air conditioning is standard from level one Access models, with dual zone automatic air conditioning from level two Active versions. Dual zone air conditioning regulates the temperature in each section of the passenger compartment, driver side and passenger side.

CORNERING ASSIST FOG LAMPS

With LED daytime running lamps standard across the range, cornering assist fog lamps are standard from level three Allure models. They automatically light up the inside of a corner to give greater visibility, at speed of less than 40km/hr (urban driving, winding roads, junctions, parking...).

PANORAMIC ROOF WITH LED LIGHTING

Optional on level two Active models, and standard from level three Allure models, the Peugeot full length panoramic Cielo roof is a fixed glass roof that bathes the cabin in natural light to give an even more airy feeling. An electric roller blind is included. At night, the blue comet effect LED mood lighting brings the cabin to life, with the blind closed or not.

GRIP CONTROL

Grip Control® is available as an option from level two Active models and is standard on the level four GT Line version.

Grip Control® is an adapted traction control system which responds to most terrains and weather conditions. It acts on the front wheels by adjusting wheel spin and torque to optimise traction in low-grip conditions and uses electronic components that are already installed in the car meaning that it adds no extra weight and therefore no excessive fuel consumption, unlike a traditional 4x4. Versatile and adaptable, this system has control built in.

This unique system, patented by Peugeot, improves traction in snow, mud and sand and works with Mud and Snow all-season tyres to offer an excellent balance between safety, grip and traction. Equipped with Grip Control, the 2008 is therefore able to tackle a very broad range of conditions, allowing you to explore fresh horizons...

The Grip Control® dial located on the centre console lets you choose, from five driving modes, the appropriate mode for the surface you encounter.

1. **Standard ESP:** suited to everyday conditions. The system is calibrated with a fixed low level of skidding.
2. **Snow Mode:** suited to icy, snowy conditions. On starting, the system adapts to the conditions of grip encountered, wheel by wheel. When making progress, the system optimises spin to provide the best acceleration possible according to the grip available. This mode is recommended in deep snow or on steep gradients.
3. **Mud Mode:** suitable for slippery roads and terrain. When setting off, this mode allows a lot of spin at the wheel with the least grip to allow the mud to be cleared and grip restored. At the same time, the wheel which has the most grip is given as much torque as possible. When making progress, the system optimises the skid to provide the best response to the driver's needs.
4. **Sand Mode:** suited to sandy conditions. This mode allows some simultaneous spin of the two driving wheels to allow the vehicle to move forward and reduce the risk of being trapped in the sand.
5. **ESP Off:** allows driver control. This mode allows the possibility of disconnecting the dynamic stability control (ESP) and the traction assistance up to 50km/hr putting the vehicle in the driver's control. Above this speed, the system is reconnected for your safety.

FIVE STAR EURO NCAP SAFETY RATING

A Five Star Euro NCAP Safety Rating: The Peugeot 2008 range scored the maximum five stars in the stringent Euro NCAP Safety Rating. Anti-lock braking (ABS), Electronic Brake Force Distribution (EBFD), Emergency Brake Assistance (EBA), Electronic Stability Programme (ESP) and six airbags all work to provide the safest driving environment possible.

PERSONALISE YOUR PEUGEOT 2008

WITH THE PEUGEOT ACCESSORY COLLECTION

PROTECTION ITEMS

Velour Carpet Mat Set: Ref. 16095514 80

Peugeot velour carpet mat sets not only protect your original floor carpet from daily grime and wear and tear, they also present an attractive means of substantially improving soundproofing and heat insulation.

Carefully finished, with an original design and 2008 motif, and fitting perfectly to the contours of the floor, the carpet mats boast a double anti-slide safeguard to ensure they do not move out of place, thanks to an anti-slip sub-layer and a fixing system.

Boot Protection Mat: Ref. 16094994 80

The Peugeot 2008 Boot Protection Mat provides effective protection for the original boot floor, when transporting goods or materials that may soil or cause permanent damage by tearing.

It fits snugly into your vehicle's boot and is water-resistant, to offer maximum protection to the vehicle and the original carpet, thus even helping to protect future resale values.

Quick and easy to fit or remove, with no permanent fixings, this top-end, anti-slip material is eco-friendly and fully recyclable.

Front & Rear Mudflap Set: Ref. 16089285 80 & 16089286 80

Developed by Peugeot's Style Centre, our front and rear mudflaps are tailor made to ensure harmony with your chosen vehicle's lines. Shaped specifically to suit your car, they are securing fixed and offer maximise car body protection in mucky-terrains.

For improved effectiveness, the mudflaps are semi-rigid: they adapt to the road conditions and even according to speed.

TOW BARS

Tow Bar with Tow Ball that can be removed without tools: Ref. 16070765 80

A tow bar is the perfect solution when you want to increase your loading capacity and tow a trailer, boat or professional equipment in complete safety.

This tow ball can be fitted and removed in a matter of seconds, without any tools, allowing you to easily and effortlessly change the appearance of your vehicle. It is even recommended for vehicles fitted with a rear parking assistance system. It comes supplied with a storage bag.

NOTE: Always know your vehicle's maximum towing weights and gross train weights before attempting to tow goods or equipment. A wiring harness must be fitted with all tow bars.

PERSONALISE YOUR PEUGEOT 2008

WITH THE PEUGEOT ACCESSORY COLLECTION

LUGGAGE SOLUTIONS

Set of Transverse Roofbars: Ref. 16084746 80

Roofbars allow for the fixing of additional load components such as roof boxes or bike-carriers, and are a great means of freeing up boot space. They are designed to simply increase your 2008's load capacity.

Our Roofbars comply with precise and rigorous specifications that guarantee optimum fixing to your 2008, even at high speed. They have been subjected to the severest endurance and wind tunnel tests.

These Roofbars are City Crash Test approved (international safety standard). A security system also protects the Roofbars against theft. Delivered pre-assembled, the time for fitting the bars is reduced to the minimum.

Bike Carrier on Roof Bars (1 bike) "Pro-Ride": Ref. 16077988 80

Bike carriers on roof bars conveniently take up less space, keep the bikes from rubbing against each other and minimise the risk of damage to your 2008's bodywork.

This carrier comes pre-assembled, for rapid installation without the need for tools and it can be adapted for all wheel dimensions. Detachable and adjustable straps ensure quick and easy loading / unloading of your bike. Developed to a rigorous specification and designed to be resistant to weather and road conditions, these bike carriers have been subjected to both Pull Tests (resistance tests) and City Crash tests.

STYLE

17" Pyxis Alloy Wheel Kit: Ref. 16104527 80

Alloy wheels are one of the rare parts that can profoundly transform a vehicle's aesthetics, lending prestige and even more stand-out to your vehicle. Like all our alloy wheels available as accessories for our many models, this alloy wheel has been designed and developed to integrate with the features of your 2008.

Wheels are not subject to any regulatory restrictions. This explains why the majority of wheels on the market vary so greatly in performance and quality. A series of stringent tests (impact tests, fatigue tests, etc.) have been carried out on our Genuine Peugeot Alloy Wheels to guarantee you quality. These tests are generally not carried out on wheels sold in car accessory retailers.

For maintenance, use the alloy wheels cleaning products recommended by Peugeot. Peugeot also recommends the fitting of "anti-theft" wheel bolts when purchasing Alloy Wheels.

FURTHER 2008 ACCESSORIES ARE AVAILABLE AT YOUR LOCAL PEUGEOT DEALER. ASK YOUR LOCAL PEUGEOT DEALER TODAY FOR DETAILS.

PEUGEOT PROTECT

Protect your Peugeot against paw prints and passengers

From muddy paws to sticky fingers, keep your car looking shiny and new with our range of Peugeot Protection products. Whether it's preserving your paintwork against the weather, or your four-legged friend's muddy paws have taken a walk over your upholstery, all our products have been created to make sure they don't leave a mark.

Developed to withstand the harshest environments, our paint and fabric products are guaranteed to maintain your car's appearance for a minimum of three years. So, whatever gets spilt, dropped or splashed (in or out) of your Peugeot, you can relax knowing it's protected.

There are three protection products available, which you can find out more about below:

- **Paint sealant**
- **InteriorGard**
- **LeatherGard**

PAINT SEALANT

Designed to keep your paintwork as pristine as it was in the showroom, our Paint Sealant Products provides your car with an invisible protective barrier – with a high gloss finish.

- It shields the paintwork against the elements, tree sap and pollution.
- Paint sealant is professionally applied by trained technicians.
- It means maintenance is easy – all you have to do is wash the car.

INTERIORGARD

Protect and preserve the look and feel of your car's interior with our specially formulated InteriorGard.

- Once applied to your car's fabrics and carpets, the resin based formula will repel spills and stains – making light work of cleaning.
- A protective invisible barrier prevents against marks and reduces friction on fabrics, preserving your interior's look and feel.

LEATHERGARD

The perfect product to keep your car's leather in superb condition, our LeatherGard formula has been designed to both clean and protect your car's upholstery without affecting its supple feel.

- LeatherGard helps to preserve, care for and maintain the new look of leather seats.
- It restores and conditions the natural oils within the leather.
- Allows the leather to breathe, which helps to prevent it from drying out and cracking.
- It also protects against any dye which may be transferred from clothing onto your car's interior – which once protected, will simply clean off.

All three of our protection products are developed with Supagard, a market leader in professionally applied quality car care products.

ASK YOUR LOCAL PEUGEOT DEALER TODAY FOR DETAILS OF OUR PEUGEOT PROTECT PRODUCTS.
